

Quality and Environmental Policy

Quality policy

Our policy is to:

- create confidence for our products, our knowledge and our continuous work to meet the customers expectations and demands.
- deliver products and services with right and high quality
- keep promised delivery dates and have the highest possible service level as demanded by our customers
- have easy and clearly defined responsibilities and work processes with our customers and suppliers
- work with continuous improvement and development of our products and processes
- ensure that the entire organization work towards the stated goals and is open for changes in working methods and processes
- see development and improved quality as a natural part of work

Environmental policy

Our policy is to:

- continuous follow-up our company's environmental impact
- continuously decrease and prevent the company's negative impact on the environment
- continuous raise the environmental awareness within the company
- fulfill and exceed all relevant, national and international, environmental legislation
- to have internal targets to save energy, raw material and use all our resources efficiently
